PROFESSIONAL SUMMARY

QA Engineer with 1.7 years of experience in manual testing, API testing, Playwright automation, functional testing, regression testing, and end-to-end testing across FinTech payment platforms, social casino gaming, and enterprise manufacturing ERP applications. Experienced in designing and executing 7,000+ test cases and identifying 1,000+ defects across complex, role-based, transaction-driven applications.

CORE QA SKILLS

Manual & Functional Testing • API Testing (Postman) • Playwright Automation • Regression Testing • Smoke Testing • End-to-End Testing • UI Testing • Cross-Browser Testing • Cross-Platform Testing • Database Testing • RBAC Testing • Payment & Transaction Testing • Game Testing • RTP Testing • Load Testing • Defect Lifecycle Management • Test Case Design & Execution • Calculation-Based Testing

SKILLS

Automation: Playwright (JavaScript)

API & Performance: Postman, API Testing, Apache JMeter, Load Testing

Tools: JIRA, GitHub, Microsoft Clarity, Plane, BrowserStack (Device-Based Testing)

Languages: HTML, JavaScript, SQL

Domains: FinTech Payments, Social Casino Gaming, Web & Mobile Applications, ERP Platform for Agrochemical Manufacturing

Soft Skills: Strong communication, team coordination, problem-solving, attention to detail

PROFESSIONAL EXPERIENCE

Junior Quality Analyst | Sep 2025 – Present

Austin, TX — Remote

- Performed comprehensive manual, functional, regression, smoke, UI, and end-to-end testing to validate application functionality, stability, and quality.
- Designed, reviewed, and executed detailed test cases and test scenarios based on business requirements, functional specifications, and acceptance criteria.
- Built and maintained Playwright automation using JavaScript, developing reusable automation scripts and expanding test automation coverage.
- Conducted API testing using Postman, validating response status codes, response payloads, backend functionality, and data accuracy.
- Executed load testing using Apache JMeter to evaluate application performance and backend reliability.
- Performed cross-browser and cross-platform testing to ensure consistent functionality and user experience across supported environments.
- Conducted database testing and data validation to verify data accuracy, consistency, and application behavior.
- Managed the complete defect lifecycle using JIRA, including defect identification, documentation, prioritization, tracking, retesting, and closure.
- Collaborated with developers and QA team members during Agile/Scrum sprints, participating in defect triage, root-cause analysis, regression cycles, and release validation.
- Performed post-release verification and retesting to ensure defect fixes and application changes met quality requirements.

Quality Analyst Intern | Jan 2025 – Aug 2025

Austin, TX — Remote

- Performed functional, regression, smoke, UI, and post-release testing across application releases.
- Validated REST API responses using Postman to verify backend functionality, response data, and integration reliability.
- Created, documented, and tracked defects in JIRA, providing clear reproduction steps, expected results, actual results, and supporting evidence.
- Performed cross-browser and cross-device testing to validate consistent application functionality and UI behavior.
- Collaborated with developers and QA team members to verify defect fixes and maintain application quality throughout sprint cycles.

KEY PROJECTS

Getways — FinTech Payment & Gaming Transaction Platform

- Executed 1,642+ test cases and identified 420+ defects.
- Tested Player, Agent, Master Agent, and Super Admin workflows.
- Validated payment integrations including WERT, Stripe, Coinbase, Fiserv, CLKK, and PayNearMe.

Vegas Empire — Social Casino Gaming Platform

Vegas Empire Website

- Executed 160+ test cases and identified 60+ defects.
- Tested player-facing gameplay and functionality across 100+ slot games.

Vegas Empire Game Admin Portal

- Executed 2,000+ test cases and identified 200+ defects.
- Tested multi-level role hierarchy, user management, game CRUD, game coins, RTP, bonus features, recharge/redeem, support tickets, and chat/message functionality.
- Performed functional, regression, cross-platform, and role-based access testing.

AgroPack ERP — Manufacturing Execution & Quality Control System

- Executed 3,500+ test cases and identified 350+ defects.
- Tested workflows across 7 enterprise roles.
- Validated product and sample management, batch creation, laboratory testing, QA analysis, chemical inventory, production approval, COA workflows, and packaging plant controls.
- Performed functional, regression, end-to-end, RBAC, and workflow-based testing.

EDUCATION

Master of Computer Applications (MCA) | Aug 2023 – Aug 2025

L J University, Ahmedabad | CGPA: 7.94

Bachelor of Computer Applications (BCA) | Mar 2020 – Mar 2023

Kutch University, Bhuj | CGPA: 6.35

CERTIFICATIONS

- QA Internship Certificate
- Agile and Scrum Fundamentals with JIRA
